

Terry Gallentine - Glass

Artist's Statement/Biography: I grew up in the Black Hills of South Dakota on a small cattle ranch. It was there where I found out, with the help of my mother and father, that one can achieve many things with a desire to learn and a lot of work. I received a BFA from the University of North Texas and soon after began a lasting relationship with glass as a medium. I moved to the twin cities area some thirty years ago and now have a studio outside of River Falls.

Description of Art Produced: I use kiln fired glass techniques such as fusing, slumping, painting, pressing, and pate de verre to create glass work that interests me and I hope others as well.
