

Dale Lewis - Sculpture

Artist's Statement/Biography: I'm an Electrical Technician and Machinist who has worked for a specialized machine builder. After leaving the work force, I found myself with time to experiment with making mosaic sculptures. Five years ago, I bought equipment and started making welded metal sculptures. My hobby has become a fulltime obsession for me; I try to make each piece entertaining. One recurring comment I hear from people is that my art makes them smile, and that's what makes it fun! There's no turning back now, this is what I want to do when I grow up!

Description of Art Produced: I specialize in welded metal sculptures with many made of stainless steel. I also enjoy making mosaic sculptures.

Other Important Information: My art is displayed in many cities, several states, and two countries.
